

REYNOLON® PVC SHRINK FILM

A RESPONSIBLE PACKAGING CHOICE

Reynolds Flexible Packaging certifies that Reynolon PVC Shrink Films are a safe and sustainable packaging option. The following provides information on our Reynolon PVC Shrink Films and our manufacturing processes.

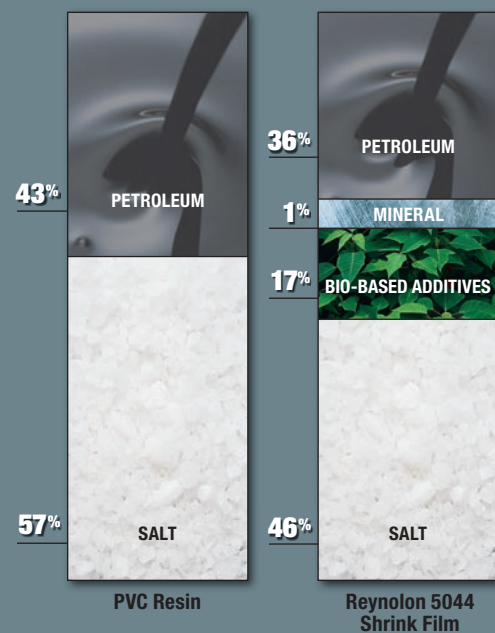

A SAFE PACKAGING CHOICE

- Domestically manufactured
- Complies with OSHA and EPA regulations
- No cadmium or lead used in production
- No phthalates used in production
- Approved for use in food applications under FDA regulations

A SUSTAINABLE PACKAGING CHOICE

- Up to 62%* of raw materials are from bio-based, renewable resources
 - 57% of PVC comes from salt, an abundant resource
 - Reynolds utilizes plasticizers derived from renewable resources: soybean oil and tree oil
- Requires less energy to shrink, decreasing energy costs
- A recycling code of 3

** percentage may vary with product formulation*

Reynolds stands behind the facts on the quality, performance, safety and sustainability of its Reynolon PVC shrink film.
